

We had a great day when

the
**Happy
Puzzle
Company**

came to visit

At Stockton Wood we are committed to supporting our pupils to become independent learners and thinkers! So we were delighted to invite **The Happy Puzzle Company** to run a series of workshops.

At first, the challenges all looked incredibly easy... until the children started trying to solve them! Each activity gave pupils the opportunity to improve their personal learning and thinking skills, maths, logical reasoning and team skills. Above all, it will boost their self-confidence and raise their own expectation of what they can achieve. This 'can do' attitude and resilience is something we are keen to put at the heart of all of our learning.
