## KS2: Guess My Number

Like the game 'Headbands'. Someone writes a number on a sticky note but they aren't allowed to show you. Place the sticky note on your forehead. You then have to ask questions about the number to work out what the number is e.g. is it more than 20? Is it less than 36? Is it odd? Is it even? Does it have two digits? Is it a teen number? Are there 3 tens? Is it a multiple of 5? Is it a square number? Etc.

This game is a good opportunity to think about numbers and use a variety of language.

It may be useful to have pen and paper to make notes of the information you have gained about your number.

Have fun!
