

RMeasimaths™

UPDATE April 2020

Dear Parents, Carers and Pupils,

RMeasimaths is currently being re-developed as it has moved away from being a Flash based product. In the meantime, below are some ways you can still maths program at home.

Android tablet users

As you may already be aware, the RMeasimaths Android app is no longer available to download from Google Play.

As an interim measure RMeasimaths has been made available through the Puffin Academy Class Portal or **Puffin Academy** app on Google play. See instructions on how to download on the next page.

Laptop and PC users

You can still access RMeasimaths on a laptop or PC via www.rmeasimaths.com. You may need to allow flash in your settings.

Apple iPad tablet users

The RMeasimaths iPad app still works if you previously had it (so don't delete it) but it is no longer available to download from the Apple App Store. We are awaiting further news of this development.

There is a **Puffin Academy Pro** app available from the Apple App Store (at a cost of £4.99) which allows you to use RMeasimaths on the iPad.

How to get access to RMeasimaths via the Puffin Academy Class Portal

1. On your Android device, download the free Puffin Academy app from the Google Play Store.
2. Once installed, open the Puffin Academy app.
3. Select Home Page.
4. In the Latest Courses section, RM Education Easimaths will be listed (or you can search for Easimaths if that isn't listed).
5. Select RM Education Easimaths, followed by Install.
6. A message stating "Do you want to install this site" will be displayed. Click OK.
7. The RM Education Easimaths app will now be listed on the Puffin Academy app's Home Page.
8. From the Home Page, select RM Education Easimaths to open the standard RMeasimaths Home Page that you would see if you were logging on via a web browser on a computer.
9. Enter your usual RMeasimaths credentials to log on to RMeasimaths. You will now be able to complete your RMeasimaths session as normal on your Android tablet.

How to get access to RMeasimaths via the Puffin Academy Pro app

1. On your Apple device, download the Puffin Academy Pro app from the Apple Store (cost £4.99)
2. Once installed, open the Puffin Academy Pro app and type in 'rmeasimaths login' in the search space at the top.
3. This should lead you to the RMeasimaths web page and then login page. Login with your login details as normal.

This app is allowing you to access a browser which normally requires Flash - which you can not normally do on an Apple device.
